DETAILED ACTION

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3 and 20 "second wiper" and "second sealing ring" lack proper antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 12, 19-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Riebe (WO 99/06303).

Art Unit: 3754

Riebe shows a valve comprising a valve body 1, valve stem 7 and a sealing ring 9 including a wiper (surface for hole in sealing ring).

Claims 1, 3 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Heinzl et al.

Heinzl et al show a valve comprising a valve body 112, valve stem 48 and a sealing ring 60 including a wiper 62.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-20 and 22-25 rejected under 35 U.S.C. 103(a) as being unpatentable over Heinzl et al in view of Riebe (WO 99/06303) .

Heinzl et al lack the stem and seal including a lubricant, the propellant liquefied HFA134a, and a medicament comprising salmeterol xinafoate and fluticasone propionate. Riebe shows an aerosol comprising the stem and seal including a lubricant, the propellant liquefied HFA134a, and a medicament comprising salmeterol xinafoate and fluticasone propionate to dispense medicaments. It would have been obvious to one of ordinary skill in the art to have modified the Heinzl et al aerosol with the stem and seal including a lubricant, the propellant liquefied HFA134a, and a medicament comprising salmeterol xinafoate and fluticasone propionate as taught by Riebe to dispense a medicament.

Allowable Subject Matter

Claims 2, 4-11, 13-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Beard et al was cited to show another example of an aerosol valve.
